Touch  
Light Switch

---

**User Manual**

# Touch Light Switch

---

## **TECHNICAL CHARACTERISTICS**

---

- The touch light switch activates the mirror lighting. The switch is backlit with cool white and has functions for turning on, off, and changing the intensity of the lighting. The switch is located in the middle at the bottom of the mirror. (In case of a different choice in the configurator: on the left or right side of the mirror, in the middle of the height.)

---

## **LIGHTING CONTROL**

---

1. When the mirror is connected to electricity, the touch switch will light up in white.
2. A short press/touch of the button turns on the LED lighting of the mirror.
3. The intensity of the lighting can be adjusted by holding the touch switch for a long time until you reach the desired intensity.
4. To turn off the LED mirror lighting, briefly press the touch switch.

Thank you for  
choosing  
our product.
